## **DETAILED ACTION**

### ***Response to Amendment***

Examiner acknowledges response by applicant's representative received 10/19/04. Examiner further acknowledges the corrections/clarifications made to address the issues of the first action as well as the cancellation of claim 3.

### ***Allowable Subject Matter***

1. Claims 1, 2 & 4-21 are allowed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The following is an examiner's statement of reasons for allowance: Patentability has been found because the prior art fails to suggest or show the combination as set forth in the independent claims 1, 8 & 15 including indicia measuring the approximate depth within the stack at which the indicator cards is inserted and the permitting and restricting of additional players relative to the position of the indicator card. This requirement is not seen or fairly suggested by the prior art of record.

The closest prior art of reference was Glavich et al (267). Glavich discloses Gaming Device having Wild Indicators. Glavich teaches the use of an indicator device in the form of a Wild card. Glavich et al., however, fail to anticipate or render obvious applicant's invention because the functionality of his Wild card is very different from applicant's invention.

### ***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot since the claims are now in condition for allowance.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
